

Josh Henry

Senior React Native Mobile Software Engineer

josh.d.henry@gmail.com | joshhenry.info | Portland, OR

SUMMARY

Senior mobile engineer with 10 years shipping production React Native apps on iOS and Android, from greenfield builds through App Store and Google Play releases. Deep native-module work across Swift, Objective-C, Java, and Kotlin. Drives features from design through release, handling interface, state, networking, and offline-first data on the device. Deliberate about quality, with particular attention to mobile performance, reliability, and testing strategy. AI-assisted development is a regular part of my workflow.

SKILLS

Languages: TypeScript, JavaScript, Swift, Objective-C, Java, Kotlin, HTML, CSS

React Native: React Native, Expo, React Native Web, React, Native Modules

UI/UX: React Navigation, Reanimated, Animated, react-native-gesture-handler, styled-components

Media: WebRTC, AVFoundation, CallKit

Data & State: REST, GraphQL, Protobuf, Redux, Context, MobX / MobX State Tree, SQLite, Realm, AsyncStorage, Keychain/Keystore, offline-first design, Twilio Sync

Testing: Jest, React Native Testing Library, React Testing Library, Nightwatch, WDIO, LambdaTest, Accessibility

Build & Release: CI/CD, Bitrise, App Store & Google Play deployment, TestFlight, Gradle, CocoaPods

Tools: AWS, AWS Amplify, Docker, Azure, Firebase, Datadog, Bugsnag, LaunchDarkly, Git, Node, patch-package, Reactotron, Postman, Xcode Instruments, Android Profiler, Storybook, Figma

Methodologies: Agile, Scrum, test-driven development

AI-Assisted Development: Claude Code, GitHub Copilot, GitLab Duo

EXPERIENCE

Stroom (acquired by Frontdoor) | Remote

February 2023 - July 2026

Senior React Native Mobile Software Engineer

- Architected and built a React Native video-calling SDK from the ground up in Expo and TypeScript, replacing 2 separate native iOS and Android SDKs with 1 shared codebase and powering 100,000+ WebRTC video calls between remote home repair experts and home warranty customers.
- Engineered and patched native modules across four languages - Swift, Objective-C, Java, and Kotlin - for both iOS and Android, integrating AWS Chime and Twilio Video for camera capture and video streaming, and CallKeep for audio routing and call handling.
- Participated in integrating the SDK into the 2 consuming apps as both moved from native to React Native, partnering closely with the app teams to support the AHS app's launch on the App Store and Google Play, serving about 2 million home warranty members and now rated 4.9 on the App Store and 4.8 on Google Play across 71,000+ ratings.
- Founded and led weekly React Native Collab meetings across Frontdoor's app teams for 2 years, drawing 10 to 15 engineers from 3 teams each week. Set an example through code reviews, mob debugging sessions, and multiple technical talks on React Native-related topics.

Fall Guy Consulting | Seattle, WA**November 2021 - October 2022***Senior Mobile Software Engineer*

- Shipped v2 of the Diablo Golf handicap and score-tracking app, building features natively in Swift, Objective-C, and Java in parity across iOS and Android.
- Deployed the frontend and backend applications for the v2 release on AWS and added reporting features in the React single-page admin app.

Committee for Children | Seattle, WA**March 2020 - November 2021***Senior Software Engineer*

- Developed two lesson players in React and React Native Web for SecondStep.org, a social-emotional learning platform serving 45,000+ schools and 10M+ students annually, built on complex Redux data structures and optimistic API updates.
- Served as interim team lead for 6 weeks, releasing the MVP of Second Step SEL for Adults during that span.
- Established the test plan covering 3 projects - the K-8 lesson player, the SELA lesson player, and the SecondStep.org platform, spanning unit, component, and end-to-end coverage across Jest, React Testing Library, and Nightwatch.
- Participated in accessibility audits and remediation on the lesson players to meet WCAG standards and deliver inclusive experiences for students and classrooms.

Fall Guy Consulting | Seattle, WA**July 2017 - March 2020***React Native Mobile Software Engineer*

- Developed Mind Yeti, a React Native Web mindfulness app for schools and children. Built its full-featured meditation media player with closed captioning, consumed its GraphQL API through Apollo, and managed services across AWS and Google App Engine.
- Delivered the official Gen Con convention app in React Native for 60,000+ attendees - an offline-first app that downloads events over a token-authenticated REST API and stores ~20,000 locally in Realm, tokenized with Lunr.js for fuzzy on-device search, engineered for low-connectivity convention halls, with camera badge scanning for e-ticketed event entry.

Big Smash Software, LLC | Seattle, WA**June 2016 - July 2017***Founder / iOS Developer*

- Founded an independent studio and shipped 4 iOS apps and 1 open-source CocoaPod in Swift and Objective-C.

EDUCATION

Bachelor of Science, Computer Information Systems - DeVry University
