

# Josh Henry

## Senior React Native Mobile Software Engineer

Portland, OR

### SUMMARY

---

Senior mobile engineer with 10 years shipping production iOS, Android, and React Native apps, from greenfield builds through App Store and Google Play releases, plus deep native-module work across Swift, Objective-C, Java, and Kotlin. Quality-focused, with depth in mobile performance, reliability, and testing strategy. AI-assisted development is a daily part of my workflow.

### SKILLS

---

**Languages:** TypeScript, JavaScript, Swift, Objective-C, Java, Kotlin, HTML, CSS

**React Native:** React Native, Expo, React Native Web, React, Native Modules

**UI/UX:** React Navigation, Reanimated, Animated, Gesture Handler

**Media:** WebRTC, AVFoundation, CallKit

**Data & State:** REST, GraphQL, Apollo, Node, Express, Protobuf, Postman, Redux, MobX / MobX State Tree, Context, AsyncStorage, Realm, Twilio Sync, offline-first design, data synchronization

**Testing:** Jest, React Native Testing Library, React Testing Library, Cypress, Nightwatch, WDIO, LambdaTest, Accessibility (WCAG)

**Build & Release:** CI/CD, Bitrise, App Store & Google Play deployment, TestFlight, Gradle, CocoaPods, Yarn Workspaces, patch-package, Docker, Git

**Tools:** AWS, AWS Amplify, Azure, Firebase, Datadog, Reactotron, Xcode Instruments, Android Profiler, Storybook

**Methodologies:** Agile, Scrum, test-driven development

**AI:** GitHub Copilot, GitLab Duo, Claude

### EXPERIENCE

---

#### Stroom (acquired by Frontdoor) | Remote - February 2023 - July 2026

*Senior React Native Mobile Software Engineer*

- Architected and built a React Native video-calling SDK from the ground up in Expo and TypeScript, powering 100,000+ WebRTC video calls between remote home warranty experts and customers.
- Engineered and patched native modules across four languages - Swift, Objective-C, Java, and Kotlin - for both iOS and Android, integrating AWS Chime, Twilio Video, and CallKeep.
- Participated in integrating the SDK into the consuming apps, partnering closely with the app teams to support the AHS app's launch on the App Store and Google Play.
- Founded and led weekly React Native Collab meetings across Frontdoor's app teams; set an example through code reviews, mob debugging sessions, and multiple technical talks on React Native-related topics.

#### Fall Guy Consulting | Seattle, WA - November 2021 - October 2022

*Senior Mobile Software Engineer*

- Shipped v2 of the Diablo Golf handicap and score-tracking app, building features natively in Swift, Objective-C, and Java in parity across iOS and Android.
- Deployed the frontend and backend applications for the v2 release on AWS and added reporting features in the React single-page admin app.

## **Committee for Children | Seattle, WA - March 2020 - November 2021**

### *Senior Software Engineer*

- Developed two React lesson players for SecondStep.org, a social-emotional learning platform serving 45,000+ schools and 10M+ students annually.
- Participated in accessibility audits and remediation on the lesson players to meet WCAG standards and deliver inclusive experiences for students and classrooms.
- Served as interim team lead for 6 weeks, releasing the MVP of Second Step SEL for Adults during that span.
- Formed and implemented a comprehensive test plan for the team's projects using four testing frameworks: Jest, React Testing Library, Nightwatch, and Cypress.

## **Fall Guy Consulting | Seattle, WA - July 2017 - March 2020**

### *React Native Mobile Software Engineer*

- Delivered the official Gen Con convention app in React Native for 60,000+ attendees: an offline-first app that downloads events over a REST API and stores and queries ~20,000 locally with Realm and Lunr.js, engineered for low-connectivity convention halls, with camera badge scanning for e-ticketed event entry.
- Developed Mind Yeti, a React Native Web mindfulness app for schools and children; built its full-featured meditation media player with closed captioning and managed services across AWS and Google App Engine.

## **Big Smash Software, LLC | Seattle, WA - June 2016 - July 2017**

### *Founder / iOS Developer*

- Founded an independent studio and shipped 4 iOS apps and 1 open-source CocoaPod in Swift and Objective-C.

## **EDUCATION**

---

**Bachelor of Science, Computer Information Systems** - DeVry University
